

The Planter Post

Editor: Fran de Lyon

Interview with the planter's own superhero: Environmental Ant!

Planter Post: What are some of the things kids can do to help take care of the environment?

Environmental Ant: Kids can do lots of things! P-Yu and I made up a list:

- Don't litter
- Pick up garbage
- Put plastic, glass, aluminum, paper and cardboard in single-stream recycling bins
- Put food waste in the composting bins
- Use reusable containers
- Turn off lights and appliances when you are not using them
- Turn off the faucet when you are not using it

- Talk to others about how they can help the environment
- Join organizations that help the environment
- Take good care of yourself by eating well and exercising - you are an important part of the environment too!

Planter Post: Do you think kids can really make a difference?

Environmental Ant: Everyone can make a difference! It doesn't matter if you are a cheese puff or a kid. You may be small, but you can do big things for the earth!
